

Calling all qualified and student radiographers who are involved in service delivery, service development, education and research. We would love to hear your views and experiences of involving patients and the public within the four domains of professional practice.

We are conducting a project exploring the implementation of the SCoR's "Patient, Public and Practitioner Partnership within Imaging and Radiotherapy: Guiding Principles" (P4) document.

This project has been funded by the College of Radiographers Industry Partnership Scheme (CoRIPS) and has ethics approval.

The four domains are service delivery, service development, education and research.

We would like to invite you to participate by completing a short questionnaire by clicking the link below. The link will take you to the questionnaire page where you will find participant information and the ethics approval details.
